

Application No.: 10/814,742
Amendment dated: 04/24/06
Reply to Office Action mailed: 02/21/06

Amendments to the Specification:

Applicant's Specification has been amended at Page 6 by revising the first three complete sentences (lines 1-5) as shown below:

“... The slats and blocks are maintained in position as shown in Figure 3 by a [bolt] pair of bolts 108 each having a head [10] 110 and a nut 112. It will be appreciated that any bolt 108 may comprise a threaded rod with a nut at each end and the like. After the [bolt has] bolts have been tightened, [an] any excess length 114 of [bolt] the bolts on the outer ends beyond the nuts can be removed if desired. ...”
